

## UP INTO SPACE

### Today's Seriously Fun Adventure...

Today we are going to travel to space with Sport Xplorer Skilful Sally. We are all astronauts, and we are going to go up up and away, into space, passing the planets, stars and reaching the moon. So let's change into our astronaut outfits ready... Don't forget your moon boots!

Sally needs our help to reach space and to become a better astronaut by listening to the pilot. Let's now get into her rocket and get ready for takeoff. Sally will press the take off button and we will zoom into space, with a huge whoosh!

Once we are up in space we will be able to see lots of planets and stars around us, and volcanoes and valleys below us. We will play a game called volcanoes and valleys, while Sally steers us around the planets in her rocket.

We will use our super powers to fly in our rocket from planet to planet. There will be lots of obstacles we have to avoid, so we don't go crashing into them. Listen very carefully to the instructions.

In space, things can fly around more easily. We will play a game moving our ball around with a racket, but must be careful to keep the ball close otherwise it might go flying off into space!

But as always, the Grumpy Grizzly bear is trying to spoil the day and cause trouble. Look out for him and try not to let him knock your ball away into space! So watch your ball but also make sure you look up sometimes to check for the Grumpy Grizzly.
